

MCSE: Server Infrastructure

The Qualification:

The Microsoft Certified Solutions Expert (MCSE): Server Infrastructure certification validates that you have the skills needed to run a highly efficient and modern data centre, with expertise in identity management, systems management, virtualization, storage, and networking.

Earning an MCSE: Server Infrastructure certification will qualify you for such jobs as computer support specialist and information security analyst.

To be awarded the MCSE: Server Infrastructure designation, students must pass a total of 5 individual Microsoft examinations. The first 3 of these make up the MCSA: Windows Server 2012 certification

Prerequisite:

Before studying for the 2 examinations detailed below, students must hold the MCSA: Windows Server 2012 certification.

Course Content:

- **Designing and Implementing a Server Infrastructure – (Test 70-413)**
Plan and deploy a server infrastructure; Design and implement network infrastructure services; Design and implement network access services; Design and implement an Active Directory infrastructure (logical); Design and implement an Active Directory infrastructure (physical).
- **Implementing an Advanced Server Infrastructure – (Test 70-414)**

Study Options:

1. **Basic:** We supply high quality course manuals. Then you study independently.
2. **Popular:** We supply high quality course materials, consisting of manuals, CDs and progress testing. We then provide additional support. We provide the student with the necessary hardware and software to carry out the exercises built into the course materials. This is done through a series of supervised lab sessions at our centre, which can be arranged at times to suit the student.

Taking the Examinations:

The Exams for the MCSE programme can be taken at any Prometric Testing Centre. The cost of sitting these examinations is not included in any fees quoted.
